PRELIMINARY AMENDMENT

Sir:

Please amend the above-identified application as follows:

IN THE CLAIMS

B1
July

1. (Amended) A superconductive apparatus comprising a composition having a transition temperature greater than 26°K, the composition including a rare earth or rare earth-like element, a transition metal element capable of exhibiting multivalent states and oxygen, [and] including at least one phase that exhibits superconductivity at temperature in excess of 26°K; ~~us on;~~ a means for maintaining said composition at said temperature to exhibit said superconductivity and means for passing an electrical supercurrent through said composition while exhibiting said superconductivity.
